Den, Melissa,
See below. Here is an interesting task.....
Cindy would use to help with water analysis if we need to do some of that in the future.

Cindy,
Den and Melissa are there with START. Will see if they can do...

Any chance we could get a sample of the material from the storage tank/source? This could be used to determine exact make-up, especially if it is a mixture.

Thanks, Cindy.... That's great. All a just-in-case I guess but one never knows if we'll be asked to do more

Hi Jack!

Actually we have been looking into this.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

(similar to our glycol method). We've ordered a standard so hope to have one in by Mon/Tues to try out on LC/MS/MS.

Cindy

Hi Cindy,

Have no idea if you are spending your Sat night looking at emails. If not, is fine. If so, can you tell me what you think about this analytical method at some point? We have an 8 am Environmental Unit call tomorrow (just established it seems). I am sure others (ATSDR, CDC) would be interested in hearing what you.....or someone else?.....has to say about the method.

Ex. 5 - Deliberative

Ex. 5 - Deliberative

Thanks!

(PS if you don't get this, will be in touch later.)
Jack

here is what I have and have shared with Cindy C at the lab at Ft. Meade.

I guess I will be part of your enviro unit.

NATIONAL WARN NOTICE - WIDE DISTRIBUTION

Many of you have likely seen reporting on the chemical spill in Charleston, WV which has impacted the drinking water for the American Water's treatment and distribution systems.

I received a request from American Water that they are seeking additional mobile lab support that can run samples for decision making support as they begin to take actions to clear the system.

The method and equipment specifications are attached.

Equipment - ThermoFisher GC/MS unit utilizes SM 524. The attached files includes the protocol utilized by Eastman, the chemical producer.

Thank you.
